

Go Beyond the Surface

CHURCH BUYER'S GUIDE

www.kieferusa.com

Specified for indoor use, Snap Sports is a modular sports flooring designed for high-speed, high-impact sports, such as in-line hockey, basketball, volleyball, soccer, tennis, and aerobic activities. Unique suspension bars and fitting interlocks for tighter seams promote uniform ball bounce, footing, and puck glide.

Revolution®

The Revolution® comes with or without TuffShield®, which provides a layer of protection against wear and tear caused by the impact of high level sports performance. The Revolution® overlays over most existing concrete, VCT, rolled synthetics, carpet or wood without removing.

Maple TuffShield®

Maple TuffShield® has the aesthetic appeal of a real maple floor combined with the advanced technology of our Indoor Bounceback surface.

Indoor Bounceback

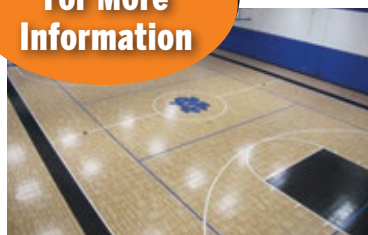

The Indoor Bounceback integrates many of Snap-Sports patented features. It's the most popular surface option in the industry. The understructure performs as a high impact shock absorber that reduces fatigue and injury.

ShockTower®

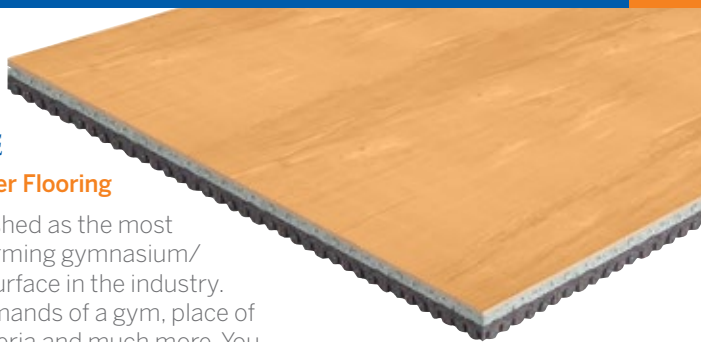

The ShockTower® has a patent ReactivePlay® technology that gives an added level of "cush" to reduce impact on joints and limbs. The shock absorbers ensure a consistent playing surface and excellent coefficient of friction to keep the surface in place.

Fixed Subfloor Systems

Connor's fixed and fixed resilient subfloor systems offer a combination of stability and resilience for maple wood surfaces. Whether they're partially or completely anchored to the concrete substrate, these systems are tailored to fit your needs.

Floating Subfloor Systems

Connor's floating subfloor systems rest freely with no anchorage to the concrete substrate. Through subfloor components and various elastomeric pads, these systems' key benefit is shock absorption and resiliency.
