

Kiefer Active Tiles

Installation Instructions

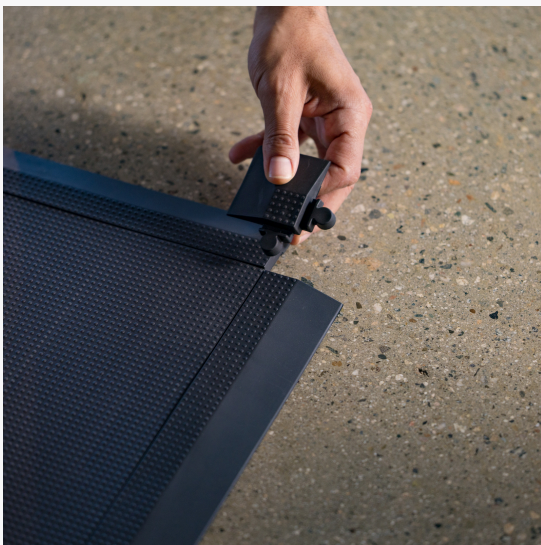

1. Prepare Your Area

- Sweep or vacuum the surface to remove debris and dust.
- Ensure the floor is dry and free of oils or moisture.
- Lay out all tiles to check color and texture consistency before locking them in place.

2. Plan Your Layout

- For the cleanest look, start from one corner or the center of the room.
- Arrange tiles with the interlocking edges facing outward.

3. Begin Interlocking

- Align the male tabs on one tile with the female slots on the next tile.
- Press firmly to snap them together.
- Continue row by row until the area is covered.

4. Finish the Edges (Optional)

- For open edges, install beveled edges and corners for a finished look and safer transitions.
